Contexto Histórico

¿Qué es Flexbox?

Flexbox es un sistema de **elementos flexibles**.

Los elementos HTML se adaptan y colocan automáticamente y es más fácil personalizar los diseños.

Está especialmente diseñado para crear, mediante CSS, estructuras de **una sólo dimensión**.

¿Qué es Flexbox?

Flexible Boxes

Contenedor padre

stretch

space-between

space-around

Propiedad flex-grow

Elementos hijos

Propiedad order

Propiedad flex-shrink

Opuesta a flex-grow.

Mientras que la anterior indica un factor de crecimiento, flex-shrink aplica un factor de decrecimiento.

Los ítems que tengan un valor numérico más grande, serán más pequeños, mientras que los que tengan un valor numérico más pequeño serán más grandes.

Propiedad align-self

Actividad: Mi portafolio personal con Flexbox
